DETAILED ACTION

Response to Amendment

1. Applicant's amendment filed February 14th 2008 has been entered and made of record.
2. Applicant has amended claims 1, 12, 18 and 29. Claims 1-29 are pending.
3. Applicant's remarks in view of the newly presented amendments have been fully considered and are found to be persuasive. Claims 1-29 are accordingly allowed.

EXAMINER'S AMENDMENT

4. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jose Gutman, Reg. No. 35,171 on May 7th, 2008.

Claim 18 should be amended as follows. In line 1 of claim 18, insert the term "non-transitory" before the phrase "computer readable medium" so that the claim reads as follows:

"A non-transitory computer readable medium including computer instructions..."

Allowable Subject Matter

5. Claims 1-29 are allowed.

The following is an examiner's statement of reasons for allowance:

Applicant has amended the independent claims 1, 12 and 18 to include the features of:

"determining 3-D depth of the plurality of pixels in the base image by contemporaneously matching image features between three or more relative images of a scene by matching ... and wherein each of the three or more images includes at least an overlapping portion of the scene relative to each other, wherein the at least three relative views of the scene are situated in a non-linear arrangement relative to each other and are further oriented in non-parallel planes relative to each other".

The reference previously cited to Chen does not teach or fairly suggest the process of contemporaneously matching the image features between three or more of the relative images and fails to teach the specific way in which the image planes are arranged non-linearly and non-parallel. Applicant's remarks explain the differences in the manner in which the present invention operates. See pages 13-17 of the Applicant's remarks. No other found prior art of record teaches the specific method that is now claimed to matching three or more image contemporaneously. Independent

claims 1, 12 and 18 and all subsequent corresponding dependent claims are accordingly allowed.

6. With regard to independent claim 29, applicant has amended the claim to overcome the previous 101 rejection by adding language to enable the creation of a concrete and tangible result. The 101 rejection is withdrawn and Claim 29 is accordingly allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
